

Education

Netaji Subhas University of Technology - B.Tech	CGPA 7.99	2021 – 2025
Hansraj Model School - CBSE XII	Percent 91.4%	2021
Hansraj Model School - CBSE X	Percent 92%	2019

Experience

Associate Software Developer, Reddoorz – Noida, Uttar Pradesh Dec 2025 – Present

- Optimized listing API response time by 10% by reducing Redis calls from 250 to 60 using thread-level caching with the Thread Store gem.
- Enhanced Elasticsearch-based search by adding new indexed fields and optimizing query structures to improve search relevance and response quality.
- Utilized AWS S3 for file storage and retrieval via background workers, enabling efficient and asynchronous media processing.
- Containerized services using Docker and Docker Compose to standardize local development environments and improve deployment consistency.
- Refactored legacy Admin Panel modules, improving stability and usability for 50+ internal users.

Associate Software Developer Intern, Reddoorz – Noida, Uttar Pradesh Aug 2025 – Nov 2025

- Built backend features for an internal Budget Management System, including role-based approval workflows to streamline financial operations.
- Developed and integrated backend modules in Ruby on Rails, improving system reliability and maintainability.
- Awarded Pre-Placement Offer (PPO) based on performance and contribution.

Technical Skills

- Languages & Tools:** Ruby, C++, JavaScript, Git, Postman
- Backend:** Ruby on Rails (primary), Node.js & Express.js (prior experience)
- Frontend:** HTML, CSS, Bootstrap, React.js (prior experience)
- Databases:** MongoDB, SQL
- DevOps / Tools:** Docker (containerization, Docker Compose)

Projects

Social Media Web App (Ruby on Rails) [GitHubLink](#)

- Built a full-featured social platform in Ruby on Rails with authentication and authorization using Devise and Cancancan.
- Implemented core social networking capabilities including posting, liking, following users, and commenting.
- Added image upload and handling using Active Storage, improving user engagement and interaction features.

Property Management System (MERN) [GitHubLink](#)

- Developed a platform enabling users to securely add, manage, and view properties with real-time updates.
- Integrated JWT authentication to protect user data and improve secure access.
- Built scalable REST APIs with Node.js and MongoDB, improving response efficiency by 25%.

Achievements

- Solved **1000+** DSA problems across platforms with a **350+** day streak on LeetCode, showcasing advanced problem-solving skills.
- Achieved **1790** peak LeetCode rating (**Top 10%**) emphasizing expertise in algorithms.
- Secured **96.78** percentile in JEE Mains.

Extracurricular & Certification

- Former member of Shatranj (Chess Society, NSUT), participated in tournaments and strategic gameplay sessions.
- Completed certification in Data Structures and Algorithms from Coding Blocks.
